

Puzzled about LEV tests?...

trust us to provide the solution!

Our LEV testing services and specialist interpretation of the results provides a reliable and cost effective way to understand and meet current HSE requirements.

Did You Know?

The new HSG258 publication from the Health & Safety Executive states that all Local Exhaust Ventilation (LEV) systems require statutory thorough examination and testing.

What does this mean?

This means that almost all LEV systems require testing every 14 months. This includes all oil mist, welding fume, smoke and dust extraction units that you currently have on site.

Who can carry out this LEV testing?

The new HSG258 guidance states that it must be a competent person and that the tests and reports must conform to HSE standards. With 40 years of experience in the manufacture and design of LEV systems, Filtermist now provide a full package of LEV services, advice and practical solutions.

Five simple reasons why you should choose Filtermist LEV testing...

- ✓ Fully meets needs of HSG258
- ✓ Expert testing and result analysis
- ✓ Full detailed report of all test findings
- ✓ Practical advice and recommendations
- ✓ Cost effective solutions

LEV is a serious matter...

for you,
your workforce
and the HSE...
so make sure
you're up
to date!
