

## Extraction Equipment Servicing

The COSHH Regulations require thorough maintenance of control measures at regular intervals so that controls remain effective at all times. Using our 40 years of experience in extraction solutions, we can provide service, spares and maintenance contracts, for all makes and models of LEV equipment.

### A Filtermist service gives you the following:

- **Cost Effective Maintenance** – Filtermist can plan your maintenance schedule and manage the visits to fit with your production schedules. Servicing units on a regular basis reduces the likelihood of system failures, and ensures your workplace environment is kept clean.
- **A Single Source of Supply** – Filtermist can provide service & spares for all LEV equipment from dust, fume and oil mist manufacturers around the world.
- **Specialist Technical Advice** – Filtermist will monitor the condition of your extraction units and report on any issues that could affect the ongoing performance, offering solutions and alternatives if required.
- **Comprehensive Service Reports** – Filtermist will provide you with easy to read electronic or hard copy reports containing air test readings for all your units, providing power is available at time of servicing.
- **ISO Certification** – Filtermist is certified to ISO9002 & ISO14001, and all products are CE marked to comply with the European Community Machinery Safety Directive.
- **National Coverage** - Filtermist are a nationally renowned company with service divisions situated around the UK, ensuring rapid reaction times for any breakdowns.
- **Health & Safety** – Filtermist engineers are SPA qualified, and a comprehensive risk assessment is carried out prior to work. All our engineers are covered by our comprehensive liability insurance, certificates of which are available upon request.
- **LEV Testing & Air Monitoring** – Filtermist can also provide LEV testing and workplace monitoring as part of the contract, to ensure you comply with COSHH regulations. Air flow monitoring equipment and record keeping systems as specified in HSG258 can be supplied as part of this service and are also available for purchase direct from Filtermist.
